

BORA

Parallel Clamp

1100 lbs. (500 kg.)
of even clamping pressure

Anti-Slip Bottom Jaw
with passive lock stays in place
while winding and will not
move unless manually adjusted

Available Sizes

18" - 571118T

24" - 571124T

31" - 571131T

40" - 571140T

50" - 571150T

Removable Jaw
Reverses for
material spreading.

Adjustable Plastic Risers
To keep the clamp upright or
stabilize the work piece.

Large, Easy-Grip Handle
Makes it easy to lift and slide
jaw along the steel bar

3.5-in. Wide Padded Jaw
Provides constant,
even pressure without
damaging material

The Bora Tool Parallel Clamp delivers exceptional clamping pressure and performance with an ergonomic design. The 3.5-inch padded jaws slide up and down the rail with a simple lift of the handle. As you tighten the clamp on your project, the jaws automatically become parallel with even clamping pressure. Robust precision clamping has never been so easy.
