Adjust from one side

The moveable clamp is connected to the handle. Hook the clamp edge across the board, line it up with the cut, and clamp it down – all without moving your feet.

The all-new BORA[®] NGX Clamp Edge System makes it even faster and easier to break down sheet material and rip boards with clean, accurate cuts every time. Simply hook the Clamp Edge across your board, line it up with your cut, and clamp it down — all without moving your feet. The ergonomically designed sliding clamp handle allows easy one-side adjustability and provides a tight grip that won't budge to quickly lock work surfaces securely into place. Made of heavy-gauge, rigid aluminum for extreme durability, the 36" & 48" Clamp Edges are compatible for use with circular saws, routers, jig saws, and other portable power tools, as well as the NGX Saw Guide System accessories. Need more length? Simply remove the easy-off end cap and insert an extension rail for additional cutting capacity - - no tools required.
